

Appendix 2: Speaker judgments

Table A2.1. *Speaker judgments. Words are divided by prescriptive vowel category. Numbers at the top of each category show the total count of words for which a speaker agreed with the prescriptive norm, where agreement = 1, disagreement = 0, and unknown = “?”, an option used 9 times by 4 speakers (shown in **shaded bold**). The final row and left-most column marked “Total” show the number of total agreements per word or by speaker; thus the table’s final row indicates the speaker’s overall agreement rate as a percentage (out of 100 words). Totals with complete speaker agreement (17 = all agreed with the prescriptive norm) appear in **bold**.*

[illegible]
